DATA SOLUTIONS

We move at the speed of fundraising.

Are you held back by inconsistent data? Duplicate records, outdated entries, and complex CRM extractions can stall your campaigns, causing delays, second-guessing, and lost momentum.

Constellation Data Solutions (CDS) – MissionWired’s fully managed data service – is built by fundraisers, for fundraisers, to align your data and meet your fundraising goals. We work inside your tech stack or ours to:

- ✦ Code and pull segments
- ✦ Automate workflows
- ✦ Eliminate duplicates
- ✦ Build salutation and ask strings
- ✦ Run NCOA + CASS
- ✦ Execute congressional appends
- ✦ Deliver clean, campaign-ready data

And we do this all while keeping you in the driver’s seat with full visibility and control. Streamlined, accurate data like this allows you to reach your donors faster, personalize appeals, and raise more than ever.

Why Constellation?

We’re fundraising data experts first. Our deep knowledge of direct response means we anticipate your needs, build scalable scripts, and deliver custom workflows that allow you to move quickly and reach supporters when it matters most.

“At Doctors Without Borders (MSF USA), our ability to launch rapid response fundraising initiatives depends on efficient and accurate data management. CDS has been an invaluable partner in ensuring that our donor engagement, fundraising, and operational workflows run seamlessly. Additionally, their responsiveness in monitoring and resolving requests via our project management tools has been instrumental in maintaining our efficiency. We deeply appreciate CDS’s commitment to excellence, allowing us to focus on what matters most – delivering lifesaving medical care to those in need.”

– Adam Goral, Senior Manager, Data Analytics, Doctors Without Borders/Médecins Sans Frontières (MSF)
